PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with hands-on experience developing Python-based applications, web platforms, AI-assisted tools, and API integrations. Skilled in Python, SQL, Flask, Django, FastAPI, data processing, and application development. Seeking an entry-level opportunity to apply technical, analytical, and problem-solving skills while contributing to a collaborative team.

TECHNICAL SKILLS

Programming: Python, SQL

Web & APIs: HTML, CSS, Flask, Django, FastAPI, REST APIs, JSON

Data & Analytics: Pandas, NumPy, Excel, Power BI, Data Cleaning, Data Validation

AI: Generative AI fundamentals, Prompt Engineering, RAG fundamentals, AI API integration

Databases & Cloud: SQL databases, Cloud Firestore, Firebase Authentication, AWS S3 fundamentals

Tools: Git, GitHub, VS Code, Docker, Postman

INTERNSHIP EXPERIENCE

AWS / Cloud Computing Intern — BrainOvision

- Gained hands-on exposure to Amazon Web Services (AWS) fundamentals and cloud computing concepts.
- Worked on cloud-based storage and deployment basics, building a practical foundation in AWS services such as S3.

PROJECTS

AI Career Assistant — AI-Powered Job Application Platform

- Developing a modular career assistant with resume generation, job discovery/application support, application tracking, and interview preparation.
- Designed a flow to tailor ATS-friendly resumes to a selected job description and let users review the resume before use.
- Includes tracking to identify jobs already applied to, job matching based on user skills, and a separate workflow for a user-provided job link.
- Uses Python and a Groq API integration for AI-powered capabilities; application features are being built iteratively.

FaceTally — Face Detection, Recognition & Counting Web App

- Developed a Flask application to detect, recognize, and count faces in uploaded media using OpenCV and face_recognition.
- Implemented Firebase Authentication with server-side token verification and user-specific known-face storage.
- Set up a Docker-based environment and persistent storage for reference face data.

AI-Powered Code Review Assistant

- Created a Python pipeline that analyzes code submissions and integrates an AI API to generate structured review suggestions.
- Implemented response parsing and prompt refinement to improve the consistency and usefulness of generated feedback.

SAMURAI REIMEI — Gesture-Controlled FPS Game

- Developing a first-person shooter game project with gesture-based controls and keyboard alternatives for accessible gameplay.
- Project design includes PC and Android support, multiplayer team rooms, and communication features such as voice signaling and pings.

EDUCATION

Bachelor of Technology — Information Technology | Sir C. R. Reddy College of Engineering, Eluru | JNTUK
2021–2025 | CGPA: 7.79 / 10

Intermediate — MPC | SASI Junior College | 2019–2021 | 91.9%

SSC | Lotus High School | 2019 | 74.6%

CERTIFICATIONS

- Python for Data Science — IBM Skills Network (Foundation Level)

STRENGTHS

Analytical thinking • Problem-solving • Quick learner • Adaptability • Attention to detail • Team collaboration
